**1555 Hrs**    **Question & Answers**

## Panel Discussion – Public Transport

*The systematic extension of public transit systems is at the core of improving the quality of life in the new cities. How can new cities cope with the exponential growth in traffic and the consequent diminution of air quality? Can electric cars and mass transport systems turn the tide? Already major cities in India are at higher capacity despite relatively low levels of car ownership. What are the workable solutions to manage the growing traffic in the cities (congestion, accidents, noise, pollution, environmental impact, etc?)*

**1605 Hrs**    **Welcome Remarks by Session Chairman**

**Ms Anjum Parwez**  
Managing Director  
BMTTC
